Kenneth,

I am sending this unsolicited testimonial to you - way overdue.

As you know last year in June of '96 I came to you with what an M.D. from Missouri Baptist Hospital diagnosed after a MRI test, as Lumbar Spinal Synoisis Neurogenic Claudication of bone inside my spine causing nerve damage, and the bone must be removed to relieve nerves. The symptom was lower back pain and leg cramps in both legs from the hips to the ankles. You looked at the negatives and said "I can help." You did!

From June 1996 thru January 1997 I saw you regularly and you always had me leave your office feeling better than before, but more importantly, you talked to me like a psychologist and taught me exercises to do every day. You gave me diet recommendations and supplements. I followed every advice that you gave me, and that was really important.

I left for Florida in February of 1997 and returned in April. We have not seen each other since then, only because you have done such a remarkable job. I'm feeling fine, my golf keeps improving, and perhaps in another couple months I'll have my game where it was before I had this problem.

Ken, I wish anyone who has such a problem, checks with a chiropractor before going under the knife. Hopefully they find out about you.

You have my permission to use this letter in any form that you wish, and I say I'll be seeing you with tongue in cheek.

May God bless you and your family.
